### DEFENCE OF PACKERS BY MAINE SENATOR

(By Associated Press.)  
WASHINGTON, Aug. 21.—Senator Edmund Pettus, of Maine, today attacked the governmental policy to assume control of business enterprises in a speech before the senate. He predicted that the public will suffer from higher costs and poorer service if enacted. He declared the packers' development of refrigerator cars and ownership of stock yards and the utilization of animal by-products constituted valuable service. He attacked the "federal trade commission" for "questionable methods" and said it was very largely losing sight of its

### WAGES TOO LOW TO KEEP FAMILY

(By Associated Press.)  
WASHINGTON, August 21.—With the resignations of more than 300 permanent officers of the navy already submitted, Acting Secretary Roosevelt began the work of proposed legislation to be submitted to congress suggesting that substantial pay increases for officers and enlisted men of the navy and marine corps. Most of the resignations are from younger officers in the lower grades who say they find it impossible to support families on their pay. More resignations now are on file than has been received from the entire regular navy in the last thirty years.

Pity the poor packer. He has no friends. Did you ever hear a man with an obese bank balance say that the love of money was the root of all evil? One's temper can be kept in sugar better than either in vinegar or alcohol.

### HIGH COST NOT DUE TO WAGES

(By Associated Press.)  
WASHINGTON, Aug. 21.—The House agricultural committee today favorably reported amended bills of the food control act imposing \$5000 fine and imprisonment of two years for profiteering. Representative Charles introduced a resolution in the House asking the president to furnish any information the federal trade commission has showing the proportion of labor cost in the total cost of the production of commodities. The national federation of labor unions said this information would dispose of the fallacy that labor costs represent the chief factor in the increased cost of living.

### CHAMPION ROPE SKIPPER MAKES HIT AT BUTLER

The rope skipping act which John M. Cuddy gave at the Butler theater last evening certainly proved to the people of Tonopah that he well deserved his title. His exhibition was short and snappy and full of pep and thrills from start to finish. All spectators were very well satisfied that they had seen an act which in its novelty and cleverness has no equal. Mr. Cuddy is as light on his feet as a fawn, as quick as a panther and as graceful as a swan. The Pantheus circuit is very fortunate in securing the services of such an artist.

"LITTLE WOMEN"

(By Associated Press.)  
WASHINGTON, Aug. 21.—President Wilson has not the power to declare peace by proclamation; nor could he consent in any circumstances to take such course prior to ratification of the treaty by the senate. The president so wrote Senator Fall in answer to a list of questions Senator Fall presented at the conference Tuesday. Mr. Wilson said the treaty provision that it become effective after ratification by Germany and three of the principal associated powers operated merely to establish peace between the ratifying powers. He said "It is questionable whether it can be said that a league of nations is in any true sense created by only three of the allied or associated governments." He said he could only express the confident opinion that immediate ratification of the treaty by acceptance of the league of the covenant as written would certainly within the near future reduce the cost of living in the United States and elsewhere through restoration of production and commerce to normal. Regarding the disposition of Germany's possessions he said the treaty conveyed no title to any powers, but merely "intrusted" disposition of the territory to the decision of the allied and associated powers.

Mr. Wilson said: "Germany's renunciation of and in favor of the allied and associated powers of her rights and titles to overseas possessions is meant similarly to operate as vesting in those powers a trusteeship with respect to their final disposition and government."

### PUMPS PULLED ON THE VICTOR

The mine situation is unchanged in awaiting commissions to all mine watchmen thereby conferring full police authority. This action followed the order of the miners meeting last evening for all watchmen to quit their respective properties. At a conference this morning it was shown that the presence of watchmen was as vital to the cause of the employees as to the employers by preventing irresponsible parties from doing anything that might involve the miners.

Last night it also was agreed that all leasers and contractors suspend work so long as the strike lasted. It was reported to the meeting that several companies were willing to meet the demands and it was declared the sense of the meeting that until the strike was called off that no special privileges be granted.

The last man in the employment of the Tonopah extension took his time check last evening after the pumps on the Victor had been drawn from the bottom so the mine may fill.

Joseph Lord, an agent of the department of labor, wired last evening that he would arrive here Saturday or Sunday.
